Zinc plated mild steel Cabinets	£	Qty
Battery alarm as standard. Door lamp over key code pad as standard. All prices exclude VAT. Delivery included.		
<b>*Key coded lock</b> Steel Cabinet, colour yellow (RAL 1016)	365.00	
<b>Unlocked.</b> Steel Cabinet non locking handle. Cabinet colour yellow	335.00	
<b>Options</b>		
<b>Alarm Kit</b> 240v / 12v transformer, magnetic door switch, sounder, LED light, alarm on/off switch	19.00	
<b>Welsh language</b> - bi-lingual label required	No cost	

All cabinets are provided with battery powered alarm and LED light unless the 12v alarm option is ordered.  
 Cabinets are yellow (RAL 1016) but can be supplied in green (RAL 6032) or another colour if required - Price on Application  
 Stainless Steel cabinets are available, please ask details.

A heated cabinet requires a 240v supply. Installation must be undertaken by a qualified electrician, this cost is not included in the above. Our cabinets use a double insulated 240v/12v transformer.

**Orders to be sent:**  
 SADS UK, Suite 6 Churchill House, West Horndon, Essex CM13 3XD  
 email: [cabinets.sadsuk@btconnect.com](mailto:cabinets.sadsuk@btconnect.com) Tel: 01277 811215

**For delivery/manufacture/invoicing:**  
 Pawle and Co Ltd, Unit 29, Horndon Ind Park, West Horndon, Essex, CM13 3XL. Tel: 01277 810170/811005  
 email: [pawleandco@hotmail.com](mailto:pawleandco@hotmail.com)

**Important information**

**Always dial 999 in an emergency.** A CPAD does not replace the ambulance service but the defibrillator can be used to save lives once the ambulance service has been called.

**\*Keycode** locks are delivered with a random code which you must record. **It is important that you speak with your ambulance service**, they may want you to use a specific code. This cabinet and code must be registered with the ambulance service Computer Aided Despatch (CAD); when a 999 call is made the defibrillator can then be located and accessed.

**CPADS must be registered with your ambulance trust.** SADS UK can put you in touch but is not responsible for the running of a CPAD scheme.

**Visual checks** of the AED status indicator must be carried out regularly and consumables replaced when necessary.

**Cabinet ref. code or postcode** - Ensure you include the cabinet reference code as advised by your ambulance service. If the cabinet ref. code has not been provided then contact your ambulance service. In the meantime use the postcode on the outside of your cabinet so that the rescuer can provide this location to the 999 call handler.
